***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 29-33 and 50-53 drawn to the electromagnetic treatment apparatus with detector (and feedback), classified in class 600, subclass 2.
- II. Claims 17-28 drawn to the HF pulse treatment apparatus, classified in class 607, subclass 2.
- III. Claim 34-49, drawn to the method of treating using comparison to maximum and minimum field strengths (with and without a proximity sensor), classified in class 607, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as RF ablation. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Groups I-III is not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
